Batch No: C1

Enrollment No.: FCOW19118

Experiment No: 07

Experiment Name: Write a program to display a JLabel on JFrame

Experiment No.: 07

Experiment Name: Write a program to display a JLabel on JFrame

Objective

O18RA63.1. Create GUI using different swing & AWT components.

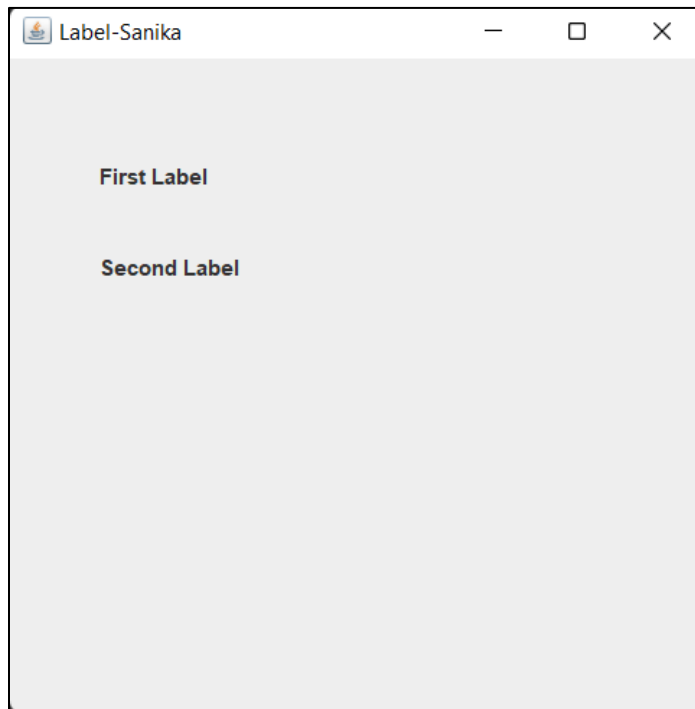

Implementation:

Program:

```
import javax.swing.*;

public class JLabel {
    public static void main(String args[]) {
        JFrame j = new JFrame("Label-Sanika");
        JLabel j1 = new JLabel("First Label");
        JLabel j2 = new JLabel();
        j1.setBounds(50, 50, 100, 30);
        j2.setBounds(50, 100, 100, 30);
        j.add(j1);
        j.add(j2);
        j.setSize(400, 400);
        j.setLayout(null);
        j2.setText("Second Label");
        j.setVisible(true);
        j.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
    }
}
```

Output:

Conclusion- Thus we have written a program to display a JLabel on JFrame.
